Three engagement tiers · institutional audit-layer pricing

From single-operator dashboard to white-glove acquisition advisory — same audit trail, same patent-eligible methodology, structured to the buyer's scale.

Storvex sits as the institutional audit + workpaper layer above your existing storage data stack (Radius+ / TractIQ / StorTrack / Yardi Matrix). Pricing reflects three engagement depths — **Operator** for single-operator deal screening, **Enterprise** for multi-user REIT / capital-partner adoption, and **Advisory** for white-glove DJR-led market entry. Every tier ships the same audit-graded primary-source registry (EDGAR + County Permits), Underwriting Confidence Score, and REC Package output — the differentiator is seat count, configurability, and the degree to which Dan personally runs the platform on the buyer's behalf.

THREE TIERS · SELF-SELECT BY SCALE + ENGAGEMENT DEPTH

STORVEX OPERATOR

Single-operator deal screening

$2,500/month

Annual contract · 1 user seat · cancel any time after 90 days

WHO IT'S FOR

Independent storage operators, NSA-ecosystem stayers, 1031-fund principals, boutique acquisition shops, family offices acquiring 1–10 facilities per year.

- Per-operator dashboard with single buyer-lens profile
- The Read — address lookup + OM drop + Verify Screenshot intake
- Bulk-import CSV verification at scale (Radius+ / TractIQ exports)
- JDA-pattern daily brief (maturity-pressure forced-sell hunt)
- REC Package generator with institutional Goldman-exec output
- Audit-layer Verification Oracle (EDGAR + County Permits)
- Underwriting Confidence Score (A+→F per submarket)
- 1 user seat · email support (24-hr response)

STORVEX ENTERPRISE

Multi-user REIT + capital-partner scale

$10,000/month

Annual contract · 5+ user seats · custom buyer-lens · API access

WHO IT'S FOR

Public REITs (PSA / EXR / CUBE / SMA / SmartStop / scrappier-growth), private equity acquirers, lender deal-screen teams, multi-MSA capital-partner platforms, vertically integrated operators.

- Everything in Operator, plus —
- Multi-user seats (5 base · $1,500/seat after) with role-based permissions
- Custom buyer-spec lens (cap-rate targets, YOC hurdles, opex stack, growth assumptions, occupancy floors all configurable)
- API access — maturity watchlist, verification audit log, Pressure Sentinel cluster output
- White-label REC Package output with the buyer's brand stamp
- Cross-device shared verification audit ledger (Phase B Firebase)
- Underwriting Confidence calibration loop against the buyer's observed lease-up (NDA-gated)
- SLA: 99.5% uptime · 4-hour support · dedicated success contact

STORVEX ADVISORY

White-glove DJR-led market entry

$25K–$100K/project

Scope-based · 30–90 day engagement · success fees negotiable

WHO IT'S FOR

Institutional buyers entering a new submarket, fund GPs deploying fresh capital, vertical integrators stitching a regional rollup, family offices with one-shot mandates.

- Everything in Enterprise, plus —
- DJR (Dan personally) runs the platform on the buyer's behalf for a defined market entry
- Custom acquisition-criteria intake → off-market sourcing pipeline
- Site-by-site institutional pitch decks + buyer-fit ranking
- LOI drafting + broker outreach against the surfaced shortlist
- Weekly executive readout + monthly REIC-ready committee package
- Direct phone access · same-day response · embedded in deal-screen workflow

FEATURE MATRIX · WHAT'S INCLUDED AT EACH TIER

CAPABILITY	OPERATOR	ENTERPRISE	ADVISORY
The Read · address + OM + Verify Screenshot intake	✓	✓	✓

CAPABILITY	OPERATOR	ENTERPRISE	ADVISORY
Bulk-import CSV verification (Radius+ / TractIQ)	✓	✓	✓
REC Package generator (Goldman-exec output)	✓	✓	✓
Multi-source Verification Oracle (EDGAR + County Permits)	✓	✓	✓
Underwriting Confidence Score (A+→F per submarket)	✓	✓	✓
JDA-pattern daily brief (maturity-pressure hunt)	✓	✓	✓
User seats	1	5 base + $1.5K/seat	unlimited
Custom buyer-lens profile (cap / YOC / opex / growth)	—	✓	✓
API access · maturity watchlist + verification log + Pressure Sentinel	—	✓	✓
White-label REC Package output (buyer's brand)	—	✓	✓
Cross-device shared audit ledger (Phase B Firebase)	single-user	✓	✓

Support response time	24 hr · email	4 hr · dedicated CSM	same-day · Dan direct

HOW AN ENGAGEMENT STARTS · FOUR STEPS FROM INTAKE TO FIRST AUDIT-TRAIL-STAMPED DELIVERABLE

STEP 01

Demo + scoping call

30-min walkthrough of **storvex.vercel.app/?demo=1** · live REC Package generation against a sample asset · scope your tier + buyer-lens configuration.

STEP 02

NDA + master service agreement

One-page mutual NDA covering calibration-loop data flow · MSA defines tier scope, SLA, term, and IP boundaries. Sign-ready within 48 hr of the demo.

STEP 03

Onboarding + buyer-lens config

Cap / YOC / opex / growth constants tuned to your underwrite. Optional calibration ingest of historical lease-up if you join the partnership loop.

STEP 04

First audit-trail-stamped REC

Run your first deal through The Read. Receive a Goldman-exec REC Package with every numeric field traceable to a primary source. Iterate from there.

AUDIT + IP POSTURE — WHAT EVERY ENGAGEMENT IS ANCHORED TO

Methodology
Storvex Valuation Framework v2 · 8-step institutional methodology · every constant cited to primary source (REIT 10-K MD&A · ESRI 2025 geocoded rings · SEC EDGAR primary-source registry · municipal building-permit data).

Patent posture
Supplemental provisional #64/062,607 filed 2026-05-11 · multi-source verification + audit-trail engine · ten patentable methods (Forward Supply Forecast · Equilibrium Index · Forward Rent Trajectory · Underwriting Confidence Score · Pipeline Verification Oracle · etc) · assigned to DJR Real Estate LLC.

Data registry
4,625 operator-family facilities indexed (PSA + iStorage + NSA + EXR + CUBE + SMA + AMERCO + 6 independents) · 3,205 facilities daily/weekly priced across 145 MSAs · 17 PSA MSAs with FY2021-FY2025 historical rent CAGRs · CUBE 10-yr decade · all daily-refreshed via GitHub Actions cron.

Output formats
Goldman-exec PDF REC Package · structured JSON warehouse payload · IC memo narrative · cross-buyer multi-lens comparison · all configurable per tier.

What's NOT in scope
Storvex does not replace your data subscription (Radius+ / TractIQ / Yardi). Storvex sits ABOVE that layer. Bring your existing data feeds; Storvex adds the audit trail, the buyer-lens underwrite, and the institutional workpaper output.
